

ALI KIRAT

Claremont, CA | alikirat.dev@gmail.com | linkedin.com/in/ali-kirat | github.com/alikirat | atlastaxi.netlify.app

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience designing, building, and deploying full-stack web applications using the MERN stack (MongoDB, Express.js, React, Node.js). Experienced in RESTful API development, secure authentication with JWT and bcrypt, scalable database design, and responsive, user-centered UI and UX for production environments. Proven ability to deliver applications end to end, from concept and wireframes through deployment on Netlify, Render, and MongoDB Atlas, with version control and collaboration using Git and GitHub. Strong communicator with a multidisciplinary background in education and project leadership, bringing clear problem-solving skills and familiarity with Agile development practices. Seeking to contribute to high-impact engineering teams building reliable, user-focused software.

TECHNICAL SKILLS

Programming Languages: JavaScript ES6+, HTML5, CSS3, Python, PHP

Frontend Development: React, React Hooks, React Router, CSS Modules, Responsive Web Design, Mobile-First Design, UI/UX Design, Wireframing, Cross-Browser Compatibility

Backend Development: Node.js, Express.js, RESTful API Development, API Integration, Server-Side Logic, Middleware, JWT Authentication, bcrypt, Session Management

Database: MongoDB, Mongoose ODM, Database Design, CRUD Operations, Data Modeling, MongoDB Atlas

Development Tools: Git, GitHub, Visual Studio Code, Postman, Chrome DevTools, npm

Deployment & Hosting: Netlify, Render, MongoDB Atlas, Environment Variables, UptimeRobot

Methodologies: Agile Development, Version Control, Code Review, Documentation, Security Best Practices, Debugging, Testing

TECHNICAL PROJECTS

Atlas Taxi - Full-Stack Ride Booking Application

[Live Demo: atlastaxi.netlify.app](https://atlastaxi.netlify.app)

[GitHub: github.com/alikirat/frontend-capstone-and-backend-capstone](https://github.com/alikirat/frontend-capstone-and-backend-capstone)

Technologies: MongoDB, Express.js, React, Node.js, JWT, Axios, bcrypt, CSS Modules

- Built production deployment of a ride-booking platform supporting user registration, ride scheduling, admin functions, and secure data persistence
- Developed 12+ protected API endpoints, error handling middleware, and JWT-based login flows with httpOnly cookies
- Integrated MongoDB database with relational data models and performance indexing; implemented admin dashboard with search and sorting
- Deployed frontend and backend to separate services with environment variable management for secure configuration

GitHub Repository Gallery

[GitHub: github.com/alikirat/repo-gallery](https://github.com/alikirat/repo-gallery)

Technologies: HTML5, CSS3, JavaScript, React, GitHub API

- Designed single-page React application using the GitHub REST API to dynamically display repositories and filter data
- Implemented responsive UI with clean state management, error handling, and asynchronous API requests

PROFESSIONAL EXPERIENCE

Software Engineer | Freelance | Los Angeles, CA | Feb 2022 - Present

- Design, develop, and maintain full-stack web applications with a focus on clean, modular architecture and scalable RESTful API design
- Build secure authentication systems using JWT, bcrypt, protected routes, and role-based access control across multiple applications
- Implement responsive, accessible UI components using React, CSS Modules, React Router, and custom hooks for state management
- Manage cloud-based NoSQL databases using MongoDB Atlas and Mongoose, including schema design, indexing, and query optimization
- Deploy and monitor applications using Netlify, Render, and UptimeRobot, ensuring reliable performance and continuous availability
- Utilize Git/GitHub for source control, branching, and pull request workflows to support iterative development and documentation
- Apply Agile practices such as sprint planning, backlog refinement, and code reviews to support continuous improvement and high-quality releases
- Explore AI-assisted workflows and modern tooling to enhance automation, developer productivity, and application functionality

Private Teacher | Self-Employed | Various Locations | Aug 2013 - Sep 2024

- Created personalized curriculum and instruction strategies for K-12 and college-level students across multiple subjects including English, philosophy, logic, theology, and mathematics
- Utilized educational technology tools and Microsoft Office Suite to design lessons, track performance, and communicate progress
- Adapted teaching methods to diverse learning styles, demonstrating flexibility, patience, and strong communication skills

Business Consultant | Self-Employed | Los Angeles, CA | Feb 2020 - Dec 2022

CGML - San Diego, CA (Jul 2020 - Jul 2022)

- Led digital fundraising strategy and multimedia outreach, increasing online engagement by 40%
- Managed donor communications, event logistics, and volunteer coordination to meet nonprofit fundraising goals

EDUCATION

Per Scholas | Software Engineering | Remote | April 2025

15-week intensive program: Full-stack JavaScript, data structures, algorithms, software engineering best practices

Claremont Graduate University | Master of Arts: Religion | Claremont, CA

Zaytuna College | Bachelor of Arts: Liberal Arts | Berkeley, CA

CERTIFICATIONS

AI Agents Intensive | Kaggle & Google | Dec 2025

- Covered agent workflows, tool use, structured prompting, multi-agent coordination, and evaluation using Gemini and the Agent Developer Kit (ADK)

Frontend Development | Skillcrush | December 2022

Python: Variables, Data Types, and Lists | Dataquest.io | January 2022
