SUMMARY

Full-stack software engineer with 1+ year of professional experience building and shipping web applications using React, TypeScript, JavaScript, Node.js, Express.js, and MongoDB. Experienced across the full software development lifecycle (SDLC) - from requirements and system design through implementation, testing, deployment, and production monitoring. Hands-on experience integrating LLM APIs and building AI-powered features using Anthropic Claude, Groq, and Google ADK. Background in business consulting and over a decade of teaching brings strong communication, stakeholder management, and cross-functional collaboration skills. Trilingual: English, Amharic, Arabic.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3

Frontend: React.js, Next.js, React Hooks, React Router, Tailwind CSS, CSS Modules, Responsive Web Design, Cross-Browser Compatibility, Accessibility (WCAG/ARIA), Figma

Backend: Node.js, Express.js, REST API Design, RESTful APIs, JWT Authentication, bcrypt, Middleware, Async/Await, Object-Oriented Programming (OOP)

Database: MongoDB, Mongoose, PostgreSQL (fundamentals), SQL, NoSQL, Data Modeling, CRUD Operations

AI & LLM: Anthropic Claude API, Claude Code, Groq API, OpenAI API, Google ADK, Multi-Agent Systems, Prompt Engineering, GitHub Copilot, LLM Integration

DevOps & Tools: Git, GitHub, GitHub Actions, CI/CD, Agile/Scrum, AWS (S3, Lambda), Netlify, Render, Vercel, Docker (familiar), Postman, VS Code, npm

PROJECTS

Atlas Taxi - Full-Stack Web Application | *React, TypeScript, Node.js, Express.js, MongoDB, JWT, REST APIs, GitHub Actions*

[Live Demo: atlastaxi.netlify.app](https://atlastaxi.netlify.app)

- Designed, developed, tested, and deployed a full-stack ride-booking platform using the MERN stack with TypeScript - implementing user registration, booking workflows, real-time status updates, and role-based dashboards
- Built 12+ RESTful API endpoints with JWT authentication, bcrypt password hashing, error-handling middleware, and role-based access control - following REST API design best practices and security standards
- Developed reusable React component library with hooks, props, and TypeScript - managing complex application state across multiple authenticated user roles
- Implemented CI/CD pipeline via GitHub Actions with automated deployment to Netlify and Render - maintaining production monitoring and 99%+ uptime

AI Developer Chatbot - LLM-Powered Application | *JavaScript, TypeScript, Node.js, Anthropic Claude API, Groq API*

[Live Demo: akdev-chatbot.netlify.app](https://akdev-chatbot.netlify.app)

- Built and deployed a production AI chatbot integrating multiple LLM APIs - implementing real-time streaming, conversation state management, prompt engineering, and secure credential handling
- Developed a Node.js/Express backend proxy layer for secure API key management, request validation, and error recovery

School Dropout Prevention - Multi-Agent AI System | *Python, Google ADK, Gemini, Agent Orchestration*

- Contributed to a team-built distributed AI system using Google's Agent Development Kit - designing agent coordination logic, data pipelines, and output evaluation tooling for a seven-agent architecture

EXPERIENCE

Full-Stack Software Engineer - Freelance, Remote

Mar 2025 - Present

- Design, develop, test, and deploy full-stack web applications and AI-powered tools using React, TypeScript, Node.js, and Python - following Agile development practices and SDLC best practices
- Build and consume RESTful APIs, implement authentication and authorization systems, manage database integrations, and deploy applications through CI/CD pipelines
- Integrate LLM APIs and AI tools including Claude Code and GitHub Copilot as core parts of the development workflow - accelerating implementation while maintaining code quality
- Collaborate with clients to gather requirements, design technical solutions, and iterate based on feedback

Business Consultant - Self-Employed, Remote

May 2020 - Dec 2024

- Provided consulting services across digital strategy, marketing operations, and community engagement - managing client relationships and delivering measurable outcomes across multiple engagements over five years
- Notable engagement at CGML (2020-2022): led digital fundraising strategy and web outreach increasing engagement by 40% through data-driven campaign optimization, Google Analytics, and Google Tag Manager

Private Teacher - Self-Employed, Various Locations

Aug 2013 - Sep 2024

- Designed and delivered personalized curriculum for 50+ students across K-12 and college levels over 11 years - developing strong communication, documentation, and cross-functional collaboration skills

EDUCATION

Software Engineering - Per Scholas | Full-Stack JavaScript, React, Node.js, TypeScript, Data Structures, Algorithms *Apr 2025*

Master of Arts, magna cum laude - Claremont Graduate University

Bachelor of Arts - Zaytuna College

CERTIFICATIONS

AI Agents Intensive - Kaggle x Google | Dec 2025 | Multi-agent systems, LLM orchestration, tool use, and evaluation using Gemini and Google ADK

Frontend Development - Skillcrush | Dec 2022
